Re: Employment and Internship Opportunities

Dear Hiring Professional,

I am a Florida Atlantic University Undergraduate and am thrilled at the prospect of working in the field of Computer Science within your company and putting to use the skills I have learned throughout my college education.

My employment background includes a great deal of working as part of a team in a retail environment, as well as extensive customer service in both retail and banking. Additionally, I have a strong background both learning and working independently as a result of having been exclusively homeschooled prior to my college education.

Throughout my college education, I have become versed in Object Oriented Programming: especially in C++. I have also garnered experience in the arena of web development including but not limited to various languages and frameworks, command line interfaces, hosting services, and version control.

If given the opportunity, I am confident that I will be able to not only contribute to the success of your team and organizational goals, but exceed expectations.

Please feel free to contact me at my cell (305) 505-5419 to arrange an interview or for any questions you may have.

Sincerely,

Sharon Glendale
